COURSE DESCRIPTION

This course is an introduction to the history and aesthetics of still photography and to the concept of photography as a descriptive and interpretive artistic medium. Students studying photographs in this context will discover relationships between individual photographers' choices and their own understanding of meaning. Discussions of the photos' cultural contexts and meanings will deepen their understanding of the role of still photography as a conduit for cultural values. Students will learn the fundamental concepts necessary to shoot, edit, manipulate, and print digital still photographs. Also, students will acquire the knowledge needed to analyze and critique existing work. **Students will be required to use digital still (DSLR) cameras for this course.**

COURSE OBJECTIVES

This course is an introduction to the aesthetics of still photography and to the concept of photography as a descriptive and interpretive artistic medium. Students will learn the fundamental concepts necessary to shoot, edit, and manipulate photographs and critically evaluate the images. Throughout the course you will work on defining your individual aesthetic utilizing established composition and design elements. Every assignment will utilize a new skill to develop cumulative knowledge of professional standards in imaging. Students will be challenged to think conceptually about their own visual development while acquiring technical skills.

LEARNING DOMAIN DESCRIPTION

DC 125: Digital Still Photography is included in the Liberal Studies program as a course with credit in the Arts and Literature domain. Courses in the Arts and Literature domain ask students to extend their knowledge and experience of the arts by developing their critical and reflective abilities. In these courses, students interpret and analyze particular creative works, investigate the relations of form and meaning and through critical and/or creative activity to come to experience art with greater openness, insight, and enjoyment. These courses focus on works of literature, art, theatre, or music as such, though the

process of analysis may also include social and cultural issues. Students who take course in this domain choose three courses from such choices as literature, the visual arts, media arts, music, and theater. No more than two courses can be chosen from one department or program.

LEARNING OUTCOMES

- Students will learn the fundamental concepts necessary to shoot, edit, manipulate, and print digital still photographs.
- Students will acquire the knowledge needed to analyze and interpret existing works of photography in terms of composition, depth, and semiotic meaning.
- Students will understand how to use their own digital still cameras, as well as the software Adobe Lightroom needed in the course.
- Students will review and evaluate works of photography, translating that knowledge into written criticism of the work.
- Students will be able to explain, in well-written prose, what a work of art is about and/or how it was produced.
- Students will be able to comment on the relationship between form and content in a work.
- Students will be able to assess the formal aspects of their subject and put those qualities into words, using specialized vocabulary employed in class and readings.
- Students will be able to contextualize a work of art with respect to other works of art, defining its place within a broader style or genre.
- Students will be able to contextualize a work of art in terms of contemporaneous aesthetic, social, or political concerns, discussing how these might shape the work's reception and how that reception might differ amongst various peoples and historical periods.

HOW LEARNING OUTCOMES WILL BE MET

Students will begin understanding the technical functions of their digital cameras through experiential projects and historical image making practices through research and lecture material. They will define formal and theoretical concepts as we broach them, and apply those definitions in conversation, as well as analyze images in Chicago's cultural repositories. They will utilize newly acquired critical tools and vocabulary to compose assessments of the work of their peers. They will research and write about the work of famous photographers of the past and present and discover a context for their own creation within the historical continuum.

WRITING EXPECTATIONS

Students will be expected to write a total of 5-7 pages (minimum) for this course.

HOW WRITING EXPECTATIONS WILL BE MET

Students will take weekly photographs and write a weekly analysis of their own work utilizing the new theoretical and technical principles introduced each week. Students will research and write about the work of a famous photographer with an account on the context of the content, execution, and style. Students will also compose a final reflective essay articulating the visual aesthetic embodied in their portfolios utilizing elements of the artistic statements and curated exhibitions presented in class.

ONLINE COURSE EVALUATIONS

Evaluations are a way for students to provide valuable feedback regarding their instructor and the course. Detailed feedback will enable the instructor to continuously tailor teaching methods and course content to meet the learning goals of the course and the academic needs of the students. They are a requirement of the course and are key to continue to provide you with the highest quality of teaching. The evaluations are anonymous; the instructor and administration do not track who entered what responses. A program is used to check if the student completed the evaluations, but the evaluation is completely separate from the student's identity. Since 100% participation is our goal, students are sent periodic reminders over three weeks. Students do not receive reminders once they complete the evaluation. Students complete the evaluation online in CampusConnect.
