

LSP 121 - Quantitative Reasoning and Technological Literacy II**Autumn 2020-2021****All times listed are Central Daylight Time (CDT)****Class meeting time: Mo We 9:40 AM – 11:10 AM CDT (via the following Zoom link)****<https://depaul.zoom.us/j/93392779881>****Section 101****Instructor: Mofak Hassan, PhD****Instructor email: mhassan9@Depaul.edu****Office Hours:** No appointments are required for office hours.**All office hours will be conducted in a Zoom Meeting Room via the following link:****<https://depaul.zoom.us/j/94989217866>****and during the times listed below.**

<u><i>Monday</i></u>	<i>5:00 – 6:30 PM</i>	<i>CDT</i>
<u><i>Saturday</i></u>	<i>5:00 – 6:30 PM</i>	<i>CDT</i>

*Office hours can also be arranged by contacting your instructor via email***Important Dates:**

Consult the DePaul Academic Calendar to find:

- Last date to “swap” sections of this class
- Last date to drop this class (or any class) with tuition refund
- Last date to withdraw from this class (or any class)

<https://academics.depaul.edu/calendar/Pages/default.aspx>

Especially for Autumn 2020-2021:**COVID-19 Health and Safety Precautions:**

Keeping our DePaul community safe is of utmost importance in the pandemic. Students, faculty and staff are expected to (1) wear a cloth face covering at all times while on campus, both inside buildings and outside on the grounds; (2) maintain physical distance (at least six feet) in all DePaul spaces (including classrooms, meeting rooms, hallways, rest rooms, offices, and outdoor spaces); (3) conduct a daily self-screening process for the symptoms of COVID-19 using the #CampusClear app before coming to campus; (4) complete the online Health and Safety Guidelines for Returning to Campus training; and (5) abide by the City of Chicago Emergency Travel Order. By doing these things, we are Taking Care of DePaul, Together. The recommendations may change as local, state, and federal guidelines evolve. Students who have a medical reason for not complying should register with DePaul's Center for Student with Disabilities (CSD).

Grading Options for undergraduate students

Students in all undergraduate classes, except for those in CEO cohort programs, may opt to change the grading basis for any or all of their courses to Pass/D/Fail. A grade of Pass (P) will indicate that the student's work met expectations for a grade of at least C-. Work that would merit a grade of D+ or D in the traditional grading basis would still earn a D+ or D. Work that does not merit a passing grade will earn a Fail (F). The Pass/D/Fail grading option may apply to any graduation requirement, including courses in the major, minor, Liberal Studies Program or open electives.

For further information on special considerations for Autumn 2020-2021, see.....

<https://resources.depaul.edu/coronavirus/faqs/Pages/classes-academics-students.aspx>

New for Autumn 2020-2021

Beginning Spring Quarter 2019-2020, all enrolled DePaul students were issued a BlueM@il email address (**username@depaul.edu**) that provided expanded access to software like Office 365 and Zoom.

Starting Fall Quarter 2020-2021, all DePaul-based communications will be sent to your BlueM@il email address. These communications include any emails from a DePaul office or college, or messages sent from classroom technology such as D2L. Make sure to regularly log into and check your student email through any of the various Microsoft Outlook apps and/or urls listed below.

DePaul students can get the Outlook App for personal computers or mobile devices. Ways to check email (use your DePaul login credentials):

- **Outlook web app:** Go to office365.depaul.edu and select the Outlook icon
- **Outlook desktop app:** Go to office365.depaul.edu, log in with your DePaul BlueKey account credentials and [download Office 365 including Outlook](#). Instructions for configuring Outlook for use with BlueM@il can be found [here](#)
- **Outlook mobile app:** Download the Outlook mobile app on [iPhone](#) or [Android](#) Instructions for configuring Outlook for use with BlueM@il can be found [here](#)

Course Description

This course provides more advanced mathematical and computational methods in the analysis and interpretation of quantitative information. Topics include databases, descriptive statistics, measures of association and their interpretation, elementary probability theory, and an introduction to algorithms and computer programming. Students will be introduced to advanced computer tools for data analysis, including databases and a professional statistical software package.

Objectives of this Course

This Quantitative Reasoning and Technological Literacy course is designed to help you to become a more confident, critical, and capable user of quantitative information of all kinds. It will help you to

- continue to critique quantitative arguments, whether given numerically, graphically, or in written form
- become acquainted with data analysis software as used to prepare and analyze basic descriptive statistics
- apply probability concepts appropriately
- manipulate data via the creation and use of relational databases
- understand the basic concepts of algorithm creation and computer programming

Prerequisites

- Passing grade in LSP120 or successful completion of the LSP120 Proficiency Exam.

If you feel that you already know the material presented in this course....

There is a placement exam you can take to exempt yourself from this class. You must take this exam within the first week of classes to waive the course this quarter. If you pass this exam, you will be waived from taking this course. Consult the Quantitative Reasoning Center website <http://qrc.depaul.edu> for more details.

Course Organization

The course material will be presented in three modules – Statistics/Probability, Databases, and Algorithms/Computer Programming.

Tentative Class Topic Schedule - Subject to Change

<u>Module #1</u>	Basics and Statistics/Probability	Sessions 1-8	Sep 9, 14, 16, 21, 23, 28, 30, Oct 5
Exam #1	Statistics/Probability Exam	Session 9	Oct 7
<u>Module #2</u>	Databases	Sessions 10-14	Oct 12, 14, 19, 21, 26
Exam #2	Databases Exam	Session 15	Oct 28
<u>Module #3</u>	Algorithms/Comp Programming	Session 16-20	Nov 2, 4, 9, 11, 16
Exam #3	Algorithms/Comp Prog. Exam		Nov 18 8:30 – 10:45 AM (CDT)

Modality: Online – Synchronous Class Meeting Sessions

This course will be conducted in online-synchronous modality. “On-line” means that all course materials will be available on-line; all work will be submitted on-line; and class sessions will meet online, not in a physical classroom on campus. “Synchronous” means that class sessions will be conducted during the times set aside for class meetings, via Zoom video-conferencing software, and students will be expected to attend those Zoom-enabled class sessions.

Class sessions will be recorded, and the recordings will be posted to D2L.

Course Materials Available for Self-Study on D2L

Course materials will be available for review and study on D2L. These materials will include lecture slides and handouts for each topic, as well as examples that students will be able to

follow to practice skills. Videos that demonstrate techniques will be available for many topics. Students will be able to use many of these resources in a “lower bandwidth” environment, outside videoconferencing sessions.

Office Hours via Zoom

Office hours will be conducted via Zoom videoconference. Students will be provided with the link to each Zoom session. Students do not need to make an appointment to join the Zoom meeting for office hours.

Textbook

There is no required textbook for this class.

Required Technology Resources

Students will need the following technology resources:

- A personal computer
 - This can be a PC/Windows or Mac. (Not Chromebook, tablet, or phone)
- A place to store your work (Flash drive, personal computer, “cloud” account).
- Software we will be using for this class (see Obtaining Software for this Class, below)
 - SPSS (Statistical Package for the Social Sciences)
 - MS-Office, including
 - MS-Access
 - MS-Word
 - MS-Excel
 - file-compression software (e.g. WinZip)
 - pdf reader software (e.g. Adobe Reader)
- Zoom video-conferencing software. DePaul students are eligible for a Zoom Pro account. Zoom software can be used through a web browser, but a better experience is available by obtaining, installing, and using the desktop app for Zoom.

Obtaining Software Required for this Class

You will not need to purchase software for this class. You will need to 1) review the computer you will use for class and the software currently installed on the computer and 2) take action to make sure that you have the software that you will need (e.g. Office 365 offered by DePaul)

- PC Users
 - SPSS (Statistical Package for the Social Sciences)
 - You will be able to use SPSS via a “virtual environment”. Two virtual environment options will be available to you. You will receive more detailed instructions on the virtual environments and how to use them as a part of your instructions for using SPSS.
 - MS-Office (MS-Access, MS-Word, MS-Excel)
 - Activate your Office 365 Account offered by DePaul University (at no cost to you). You will use your @depaul.edu email account to complete the activation and installation.
 - This will give you the ability to use MS-Access, MS-Word, and MS-Excel on your computer.
- Mac Users
 - SPSS (Statistical Package for the Social Sciences)
 - You will be able to use SPSS via a “virtual environment”. Two virtual environment options will be available to you. You will receive more detailed instructions on the virtual environments and how to use them as a part of your instructions for using SPSS.
 - MS-Office (MS-Access, MS-Word, MS-Excel)
 - Activate your Office 365 Account offered by DePaul University (at no cost to you). You will use your @depaul.edu email account to complete the activation and installation.
This will give you the ability to use MS-Word and MS-Excel on your computer.
 - You will also need to have Office 365 offered by DePaul installed on your Mac in order to use MS-Access on your Mac
 - You will be able to use MS-Access on your Mac via a “virtual environment”. Two virtual environment options will be available to you. You will receive more detailed instructions on the virtual environments and how to use them as a part of your instructions for using MS-Access on your Mac.

Web Browsers for this Class

- Recommended Web Browsers
 - Chrome or Mozilla Firefox browser offer the best, consistent web experience when using D2L and other educational support products (e.g. Panopto).

- Web Browsers with known problems
 - Safari and IE/Edge browsers have known issues with the educational support software we will be using (e.g. D2L, Panopto)

Grading Policy

Grades will be based on the numbers of points you earn during the quarter. Approximately 1000 points will be available from a variety of sources.

You must take all three exams in order to pass this class.

Grading Scale - Based on 1000 Possible Points

Grades Mapped to Points Earned:

- A 930 and above
- A- 929-900
-
- B+ 899-870
- B 869-830
- B- 829-800
-
- C+ 799-770
- C 769-730
- C- 729-700
-
- D+ 699-670
- D 669-600
-
- F 599 and below

Sources of Points (approximate)

- 35% Exams
- 35% Individual Homework Assignments
- 15% Team Assignments and evaluation of participation by team members
- 15% Discussion Forum Postings

An expanded description of each Source of Points:

Exams

There will be three exams.

Each of the three exams will cover a different class module – Statistics/Probability, Databases, or Algorithms/Computer Programming. Exams are not cumulative.

If you cannot take an exam due to illness or family emergency, you must inform me before the exam by email.

Students must complete all three exams in order to pass this class.

Individual Assignments

There will be individual assignments to be completed by each student. The purpose of these assignments is to give individual practice on the skills we are learning and to explore some ideas more thoughtfully and deeply. These assignments also provide the opportunity to complete work like exam problems. The assignments will be available on D2L in the Submissions section.

Assignment due dates are stated on D2L as part of the information about the Submission Folders. Any student who submits an assignment after the due date will be assessed a penalty.

Late submissions of individual assignments will lose 20% of the points for that assignment per day (or any portion of a day).

Individual assignments must be completed individually. Students who submit work not completed by themselves alone will be subject to plagiarism penalties. It is acceptable and even encouraged for students to discuss individual assignments with others, however the assignment submitted by each student must have been completed by that student alone. Any student who submits an Individual Assignment completed by another student or prepared jointly with another student will be subject to cheating/plagiarism penalties.

I will use the *TurnItIn* software available via DePaul University, to review written work as part of the evaluation process. This software detects evidence of plagiarism of submitted work.

Team Assignments

Each student in this class will be a member of a team. Each student will be assigned to a team on the first day of class.

Team assignments will be part of the work completed by all students. These team assignments will be available on D2L in the Submissions section.

Each team assignment submission must include a list of the names of the team members who contributed to the assignment.

All team members who contribute to the submitted team assignment, as reported on the contributor list submitted as part of the assignment, will receive the same number of points for that team assignment. Team members not included in the contributor list will receive 0 points for the assignment.

All class members will be expected to contribute to team assignments. At the end of the quarter, team members will be asked to evaluate the contributions of their teammates as a part of the grading process.

It is up to the team to agree upon how to complete team assignments...and it is each person's responsibility to complete work as agreed upon by the team.

It may be tempting to divide the work of the team assignment so that each team member completes only a portion of the assignment and the resulting portions are assembled for submission. That is not a good strategy. Each team member should complete the entire team assignment. There are several options for working together on team assignments. Team members may wish to work jointly on a single submission during class "team time". They may also decide that each person will complete the entire assignment independently and collaborate/review each other's work to determine the answers that should be submitted for evaluation.

No late team assignments will be accepted.

Discussion Forum Postings

You are asked at a minimum to make two posts (thread and response) on or before the due dates set in D2L.

The initial post should address the guided question provided in the module (This is done through referencing the class topics and providing insight). Students are expected to compose a thoughtful response to one or more of their classmates' posts (about one paragraph in length).

See Discussion Topics, Due Dates and Rubric below for specifics

Desire To Learn (D2L)

The Desire To Learn website <http://d2l.depaul.edu> is a secure site for course management. It contains all class materials. You must use your CampusConnect ID to login to D2L.

We will be using the Home, Content, Discussions, Submissions, Grades, Classlist, and More | Quizzes, Self-Assessment components of D2L.

At the beginning of the quarter, a D2L Welcome News Note will provide a summary of the course and the way D2L will be used for this class.

Submitting your Work for Evaluation

You will be submitting your work to D2L for evaluation.

You will submit your work to D2L in one of three different ways, depending on the work to be completed.

Those three ways are:

- Submission Folder -- for assignment products that include Word documents, database files, Excel files
- Discussion Forum – for discussion postings and responses
- Quiz – for exams

The submission method for each work product will be specified by your instructor, as a part of the instructions.

Work must be submitted in the file format(s) specified in the instructions. In general, Pages files and pdf files will not be accepted.

In some cases, the work product will be a zipped or compressed folder containing files that will be evaluated. Instructions for preparing, as well as extracting files from, a zipped or compressed folder are available in the D2L | Content | Software Environment section.

Quantitative Reasoning Center – QRC Tutors

The Quantitative Reasoning Center (QRC) will provide support to LSP121 students remotely via Zoom during Autumn Quarter. The specific hours and zoom meeting link will be posted on D2L.

Technical Support Resources

The DePaul Help Desk is up and running for all student, faculty, and staff issues during the Autumn quarter. They can be reach by email at helpdesk@depaul.edu, by phone at 312-362-8765, and online at helpdesk.depaul.edu.

Your Email Address

Email is the primary means of communication between faculty and students enrolled in this course outside of class time. As noted above, effective Autumn Quarter 2020-2021, any email sent from D2L will be sent to your BlueM@il email account. Make sure to regularly log into and check your student email through any of the various Microsoft Outlook apps and/or URLs listed above.

Email to your Instructor

When sending e-mail to me, please include your name, the topic/question, and the class ID (LSP121) in the subject of the email.

My goal for e-mail response to student questions sent via e-mail is 24 hours. In many cases, a response will be sent much more quickly. If you send e-mail off-hours (6 pm → 9 am M-F or Saturday or Sunday) you will receive a response during the next weekday.

To maximize your chances of doing well.....

Make sure that you are ready and able to take responsibility for successfully completing this course.

Online courses require that students take a greater, more active role in managing the assigned tasks of course work without the organizing framework of face-to-face class meetings. You must prepare to devote time and effort to this class.

You will need to:

- attend class meetings remotely
- review and study lectures, demos, and videos on D2L
- complete assignments to demonstrate your skills and practice for the exams
 - As a member of a Team
 - Individually
- contribute to discussions on D2L
- prepare for and complete the three exams, one covering each module.

It is likely that you will find that this class will require at least 6-8 hours of effort per week.

Courtesy in a remote learning environment.....

For Zoom meetings:

Please

- raise your hand (Zoom feature)
- use chat (Zoom feature)
- mute your audio to avoid sharing background noise

Preferred Name & Gender Pronouns

Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with differences of race, culture, religion, politics, sexual orientation, gender, gender variance, and nationalities. I will gladly honor your request to address you by an alternate name or gender pronoun. Please advise me of this preference early in the quarter so that I may make appropriate changes to my records. Please also note that students may choose to identify within the University community with a preferred first name that differs from their legal name and may also update their gender. The preferred first name will appear in University related systems and documents except where the use of the legal name is necessitated or required by University business or legal need. For more information and instructions on how to do so, please see the Student Preferred Name and Gender Policy at <http://policies.depaul.edu/policy/policy.aspx?pid=332>

Learning Outcomes for LSP 121 (QRTL)

1. **Statistics:** Students will be able to make and interpret frequency distributions; summarize data with measures of central tendency and dispersion; measure and interpret the association between variables; recognize the difference between correlation and causation; solve applied problems involving the normal distribution and z-scores.
2. **Professional Statistical Package:** Students will be able to import data from a spreadsheet or database into a statistics package; use graphical tools in a statistical package to make specialized statistics plots such as box plots and normal probability plots; calculate descriptive summary statistics using a statistical package.
3. **Probability and Chance:** Students will be able to recognize that seemingly improbable coincidences are not uncommon; evaluate risk from available evidence; and calculate basic, common probabilities.
4. **Database tools:** Students will be able to enter data into a pre-existing database; import data from a text file or spreadsheet file into a database; filter records based on a single parameter and on multiple parameters; sort records with multiple sort keys; formulate and conduct queries; generate a report from a database; recognize the difference between a flat file and a relational database; create a relational database using two or more tables; construct a query for a relational

database using joins; design and implement forms for data entry.

5. Algorithms and reasoning: Students will be able to use sequential, logical thinking; develop algorithms to solve problems; use Boolean conditionals and repetition structures to create simple computer programs.

6. Programming tools: Students will be able to construct the concept of algorithm through experimentation and reflection on everyday activities; articulate an accurate definition of an algorithm; recognize algorithms fitting the definition; construct the notion of a control structure and a repetition structure; acquire the ability to trace simple program listings using control and repetition structures; use control and repetition structures to write simple computer programs to effect a task.

How These Learning Outcomes Will Be Met

Topics will be presented via lectures and in-class demonstrations. Associated hands-on student activities will reinforce concepts and introduce techniques required to complete assignments. Team assignments serve as an introduction to concepts and techniques, as well as collaboration to achieve a group solution to assigned problems. Individual assignments continue the lessons of the team assignments with additional reinforcement of concepts and techniques.

1. Statistics: Team Assignment 101 is devoted to basic descriptive statistics, including analysis of single variables and normal distributions. Team Assignment 102 covers descriptive statistics in two-variable situations (cross-tabulation, correlation); Individual Assignment 1 covers descriptive statistics and analysis of single variables, two-variables, and normal distributions. Discussion posting assignments cover basic descriptive statistics and deceptive statistics.

2. Professional statistical package: Team Assignments 101 and 102 are completed using the statistical package SPSS and require the student to use it to solve multiple tasks; Individual Assignment 1 continues the use of SPSS

3. Probability: Team Assignment 103 covers an introduction to probability. Students evaluate risk from available evidence; and calculate basic, common probabilities. Individual Assignment 2 reinforces these concepts. A discussion posting assignment on probability challenges students to think more deeply about probability.

4. Database tools: Individual Assignment 3a introduces Access databases with table/query/form and report creation. Individual Assignment 3b reinforces those lessons and includes database design with normalization.

5. Algorithms and reasoning: Team Assignment 104 requires that each team develop an algorithm to perform a task featuring repetition/loop logic. Individual Assignment 4 reinforces the concept of algorithm preparation.

6. Programming tools: Individual Assignment 4 introduces the concepts of sequential statements, if statements, loop statements, and function call statements and requires the students to use these to solve a variety of programming problems.

Writing Expectations (these assignments overlap with those given in LSP120)

Five computer activities each of which has a final product in the form of a Word document with five to ten short paragraph responses.

Five class assignments with approximately **10** short paragraph responses.

How These Writing Expectations Will Be Met

All team and individual assignments require the students to answer questions using appropriate communication techniques, including short paragraph answers.

Identifying the Transferable Skills you acquire in your courses, jobs and internships, co-curricular involvement, and other experiences is important to your career development and success.

In this course, you will hone and build soft and technical skills that are important to employers, and it is your responsibility to highlight these skills in your resume, cover letters, interviews, and your digital presence - like your LinkedIn profile.

For assistance identifying and providing evidence of these skills, visit careercenter.depaul.edu to make an appointment to meet with a career advisor or access digital resources.

College Policies

Changes to Syllabus

This syllabus is subject to change as necessary during the quarter. If a change occurs, it will be thoroughly addressed during class, posted under Announcements in D2L and sent via email.

Online Course and Instructor Evaluation

Evaluations are a way for students to provide valuable feedback regarding their instructor and the course. Detailed feedback will enable the instructor to continuously tailor teaching methods and course content to meet the learning goals of the course and the academic needs of the students. They are a requirement of the course and are key to continue to provide you with the highest quality of teaching. The evaluations are anonymous; the instructor and administration do not track who entered what responses. A program is used to check if the student completed the evaluations, but the evaluation is separate from the student's identity. Since 100% participation is our goal, students are sent periodic reminders over three weeks. Students do not receive reminders once they complete the evaluation.

Academic Integrity and Plagiarism

This course will be subject to the university's academic integrity policy. More information can be found at

<https://offices.depaul.edu/academic-affairs/faculty-resources/academic-integrity/Pages/resources.aspx>

Academic Policies

All students are required to manage their class schedules each term in accordance with the deadlines for enrolling and withdrawing as indicated in the [University Academic Calendar](#). Information on enrollment, withdrawal, grading and incompletes can be found at:

<http://www.cdm.depaul.edu/Current%20Students/Pages/PoliciesandProcedures.aspx>

Incomplete Grades

An incomplete grade is a special, temporary grade that may be assigned by an instructor when unforeseeable circumstances prevent a student from completing course requirements by the end of the term and when otherwise the student had a record of satisfactory progress in the course. All incomplete requests must be approved by the instructor of the course and a CDM Associate Dean. Only exceptions cases will receive such approval. Information about the Incomplete Grades policy can be found at

<http://www.cdm.depaul.edu/Current%20Students/Pages/Grading-Policies.aspx>

Students with Disabilities

Students seeking disability-related accommodations are required to register with DePaul's Center for Students with Disabilities (CSD) enabling them to access accommodations and support services to assist with their success.

There are two CSD offices:

- Loop Campus (312) 362-8002
- Lincoln Park Campus (773) 325-1677
- Email: csd@depaul.edu

Students who register with the Center for Students with Disabilities are also invited to contact Dr. Gregory Moorhead, Director of the Center, privately to discuss how he may assist in facilitating the accommodations to be used in a course. This is best done early in the term. The conversation will remain confidential to the extent possible.

Please see <https://offices.depaul.edu/student-affairs/about/departments/Pages/csd.aspx> for Services and Contact Information.

Comments or Questions about LSP 121?

LSP 121 is managed and staffed by the College of Computing and Digital Media of DePaul University.

If you have general comments or questions about LSP 121, please email us at LSP121@depaul.edu.

Assignment Due Dates for Autumn 2020-2021

Materials for all assignments are found on D2L in the Submissions section

Start-up

Team 100	Sep 17 (TH) Team Organization
Individual 0	Sep 20 (SU) Student Survey
Quiz 0	Sep 20 (SU) Start-up

Statistics and Probability

Team 101	Sep 24 (TH) Statistics – Single Variable - SPSS
Team 102	Sep 24 (TH) Statistics – Two Variable - SPSS

Individual 1	Sep 30 (WE)	Statistics – Summary - SPSS
Team 103	Oct 1 (TH)	Probability
Individual 2	Oct 4 (SU)	Probability
Exam #1	Oct 7 (WE)	Statistics and Probability

Databases

Individual 3a	Oct 18 (SU)	Intro to Databases
Individual 3b	Oct 25 (SU)	Relational Databases
Exam #2	Oct 28 (WE)	Databases

Algorithms and Computer Programming

Team 104	Nov 12 (TH)	Algorithms
Individual 4	Nov 15 (SU)	Algorithms and Computer Programming
Exam #3		Algorithms and Computer Programming. Nov 18 (WE) 8:30 – 10:45 AM (CDT)

Wrap-up

Individual 5	Nov 15 (SU)	Reflection Essay and Advice
Individual 6	Nov 15 (SU)	Team Member Evaluation

Discussion Topics , Due Dates and Rubric for Autumn 2020-2021

The Topics and Dues Dates for the Topic Discussion Posts are listed below.

All Due Dates are Wednesdays. Due dates are listed below. Reponses are due one week after the Thread (Post 1) posting.

All posts are due before 11:59 PM CDT of the Due Date.

Discussion #	Discussion Topic	Thread (Post 1) Due Date	Response Due Date
0	Introduce Yourself	Sep 16	Sep 23
1	Statistics	Sep 23	Sep 30
2	Statistics That Deceive	Sep 30	Oct 7
3	Probability	Oct 7	Oct 14
4	Databases	Oct 21	Oct 28
5	Computational Thinking	Nov 11	Nov 18
6	Algorithms	Nov 11	Nov 18

Discussion Rubric for Course Topic Discussion Posts

Points	Quantity	Quality / Content/ Notes
Thread		
0/15	no thread posted prior to due date/time;	
up to 10/15	one thread	Basic comment relevant to the discussion topic
up to 15/15	one thread	Basic comment relevant to the discussion topic with additional, supporting information e.g. URL or article link with relevance to the topic and related discussion. Relate post to post of another student.
Response		
0/5	no response posting prior to due date/time;	
up to 3/5	one response	Basic comment relevant to the discussion topic responding to fellow student's post, not just agreeing or disagreeing, and why
up to 5/5	one response	Basic comment relevant to the discussion topic responding to fellow student's post with additional, supporting information about why you agree or disagree
