Summary of course

An introduction of Internet technology, its application for commerce, and their social impact. This course surveys Internet technology, collaboration and commerce activities, digital media distribution, online communities, and social networking in the Internet environment.

Learning Domain Description

The ECT 250 Internet, Commerce, and Society course is included in the Liberal Studies program as a course with credit in the Scientific Inquiry domain. Courses in the Scientific Inquiry domain are designed

ECT 250 Internet, Commerce, and Society

to provide students with an opportunity to learn the methods of modern science and its impact on the world around us. Courses are designed to help students develop a more complete perspective about science and the scientific process, including: an understanding of the major principles guiding modern scientific thought; a comprehension of the varying approaches and aspects of science; an appreciation of the connection among the sciences; the fundamental role of mathematics in practicing science; an awareness of the roles and limitations of theories and models in interpreting, understanding, and predicting natural phenomena; and a realization of how these theories and models change or are supplanted as our knowledge increases.

Learning Outcomes

At course end, students should be able to:

1. Students will understand the major principles guiding modern scientific thought.
Students will demonstrate a mastery of the science content knowledge of their SID courses.
2. Students will know that science, technology, and math serve as mechanisms for inquiry into the nature of the universe.
Students will:
 - a. identify questions that can be answered through scientific investigations;
 - b. design and conduct a scientific investigation to test a scientific hypothesis;
 - c. use appropriate tools and techniques together, analyze, and interpret data to support or refute a scientific hypothesis;
 - d. develop descriptions, explanations, predictions, and models using evidence;
 - e. describe relationships between evidence and explanations using critical and logical thinking;
 - f. recognize and analyze alternative explanations and predictions;
 - g. communicate scientific procedures and explanations;
 - h. use mathematics in all aspects of scientific inquiry.
3. Students will understand and appreciate the interrelationships among science, technology and math.
Students will:
 - a. use technology and mathematics to identify a problem or design a solution to a problem;
 - b. give examples of how science and technology inform and influence each other.
4. Students will understand and appreciate the role of science in society and in their lives.
Students will:
 - a. Provide examples of how science and technology impact our lives, and how social needs and concerns impact our development of technology and scientific investigation;
 - b. develop positive attitudes towards science, technology, and mathematics;
 - c. establish an ongoing experiential/service-learning interest in science, technology, and mathematics.
5. Students will understand the nature of science, technology, and mathematics.
Students will:
 - a. provide examples of the abuse of science, including the representation of falsifiable claims as

ECT 250 Internet, Commerce, and Society

- science and other forms of pseudoscience;
- b. explain the strengths and limits of scientific inquiry;
- c. explain the difference between evidence and inference, and the provisional nature of scientific explanations by providing examples of how our understanding of the workings of the world has changed in the past;
- d. explain the difference between probability and certainty, and describe what is meant by uncertainty in the context of science, technology, and mathematics.

Prerequisites

None

How Learning Outcomes Will Be Met

Outcomes met through regular class examinations and assignments including the 3 essay assignments and two current event article reviews, students will achieve outcomes identified in the learning outcomes.

Writing Expectations

Writing is integral for communicating ideas and progress in science, mathematics and technology. There are 3 case study review essays on general topics and 2 essays on a relevant news article.

Quizzes

Two quizzes will be available online in D2L. Quizzes are open book/notes. They will be based on the readings assigned for proceeding lessons and will be in true/false and multiple choice formats. The quizzes will cover both the content from the textbook chapters (including imbedded mini-cases) and Chapter PowerPoint Presentations. Please note that the quiz will not be automatically submitted; you need to click on the "Go To Submit Quiz" button in the bottom right corner after saving your responses and then submit it. Check the course schedule for due dates.

Homework Assignment

Assignments will consist of three case study essays. All assignment handouts will be posted to D2L. Check the course schedule for due dates.

Class Participation Discussion Board: News Article Exercises

Participation counts for 20% of your grade. Class participation is a subjective evaluation of each student's contribution to the unstructured discussion of a current event exercise.

Students are required to complete two current event news article exercises, post and respond to at least two classmates post for each. For this assignment, students are expected to read or scan publications and select a current event article relating to a topic from the class. You are required to submit a copy to D2L dropbox for a grade and post a copy to class discussion board in D2L. You must work alone. A

ECT 250 Internet, Commerce, and Society

template and grading rubric will be posted to D2L. Refer to the course schedule for due date. No Make-ups; No exceptions.

Letter Grade Determination

The following table will be used in converting numeric grades into an official letter grade for the course:

Number Scale	Letter Grade
90 – 100%	A
80 – 89.99%	B
70 – 79.99%	C
60 – 69.99%	D
0 – 59.99%	F
Note: Grades within two points from the grade thresholds will be adjusted with - or +.	

Evaluation of Students

Component	Weights
Class Participation: News Article Exercise (2)	25%
Homework Assignments: Case Study Review Essays (3)	30%
Quizzes (2)	20%
Final	25%

Note: There will be no midterm for the course.

ECT 250 Internet, Commerce, and Society

Online Course Evaluations

Evaluations are a way for students to provide valuable feedback regarding their instructor and the course. Detailed feedback will enable the instructor to continuously tailor teaching methods and course content to meet the learning goals of the course and the academic needs of the students. They are a requirement of the course and key to ability to continue to provide the highest quality of teaching. The evaluations are anonymous; the instructor and administration do not track who entered what responses. A program is used to check if the student completed the evaluations, but the evaluation is completely separate from the student's identity. Since 100% participation is our goal, students are sent periodic reminders over three weeks. Students do not receive reminders once they complete the evaluation. Students complete the evaluation online in CampusConnect.

Academic Integrity and Plagiarism

This course will be subject to the university's academic integrity policy. More information can be found at <http://academicintegrity.depaul.edu/>. If you have any questions be sure to consult with your professor.

Academic Policies

All students are required to manage their class schedules each term in accordance with the deadlines for enrolling and withdrawing as indicated in the University Academic Calendar. Information on enrollment, withdrawal, grading and incompletes can be found at: cdm.depaul.edu/enrollment.

Students with Disabilities

Students who feel they may need an accommodation based on the impact of a disability should contact the instructor privately to discuss their specific needs. All discussions will remain confidential. To ensure that you receive the most appropriate accommodation based on your needs, contact the instructor as early as possible in the quarter (preferably within the first week of class), and make sure that you have contacted the Center for Students with Disabilities (CSD) at: csd@depaul.edu.

Lewis Center 1420, 25 East Jackson Blvd.

Phone number: (312)362-8002

Fax: (312)362-6544
