

# CSC348 Introduction to Compiler Design

## Syllabus for Winter 2017

Corin Pitcher

31 Dec 2016

### Overview

An overview of the design of a compiler for a general purpose programming language; tools for designing the components of the compiler; implementing the compiler; run time environments.

### Instructor Information

- **Instructor** Dr. Corin Pitcher
- **Loop Office** 835, CDM Building, 243 S. Wabash Avenue
- **Email** [cpitcher@cs.depaul.edu](mailto:cpitcher@cs.depaul.edu)
- **Tel** +1 312 362 5248
- **Instructor's Homepage**  
<http://fpl.cs.depaul.edu/cpitcher/>
- **Course's Homepage**  
<http://fpl.cs.depaul.edu/cpitcher/courses/csc348/>  
(for lectures slides, assignments, reading schedules, examples, learning outcomes)
- **LMS Homepage**  
<http://d2l.depaul.edu>  
(for grades, quizzes, and video recordings)
- **Office Hours** : <http://www.cdm.depaul.edu/about/Pages/People/facultyinfo.aspx?fid=104>

## Prerequisites

If you are not sure that you have satisfied the prerequisites, speak to the instructor before the second lecture.

### Prerequisite Courses

- **Data Structures in Java II** (CSC301)
- **Computer Systems I** (CSC373)

### Prerequisite Skills

- You *must* have programmed with Java and C before this course.
- You must recall topics from CSC373: activation records / stack frames; assembly language.
- Integrated Development Environment (IDE) support is unavailable for many tools, so you should be familiar with use of the command line:
  - Command Prompt or Powershell on Windows
  - a shell on Linux / OS X such as `bash` or `zsh`

## Textbooks

There are two required textbooks:

- *Programming Language Concepts* by Sestoft.  
Published by Springer.  
<http://www.springer.com/us/book/9781447141556>
- *Getting Started with LLVM Core Libraries* by Lopes.  
Published by Packt.  
<https://www.packtpub.com/application-development/getting-started-llvm-core-libraries>.

## Assessment

The course grade will be based on:

Item	Weight
Classroom participation	15%
Homework assignments	20%
Compiler project	65%

The grade boundaries used for the class are:

Letter Grade	Percentage $\geq$
F	0%
D	57%
D+	61%
C-	65%
C	69%
C+	73%
B-	77%
B	81%
B+	85%
A-	88%
A	91%

## Policies I

### Changes to Syllabus

This syllabus is subject to change as necessary during the quarter. If a change occurs, it will be thoroughly addressed during class, posted under Announcements in D2L and sent via the course mailing list.

### Attendance

1. Students must attend classes to participate in project code reviews. The classroom participation component of the grade will be based on attendance. Students who are unable to attend the class due to an emergency should contact the instructor **beforehand** to receive a waiver for that day.
2. Students **must** attend the project presentations during Finals week (see the online schedule for date and time).
3. Students are expected to subscribe to the class mailing list, and read posts in a timely fashion.

4. **Lecture slides are a supplement to lectures only.** The slides are not intended to be read in lieu of listening to the lecture.

## Homework

1. Students must keep backup copies of all submitted homework and project work.
2. Homework assignments and project work will be distributed and submitted via repositories using the Git distributed version control system. Students must use their personal Git repository to retrieve and submit each assignment. Students will need to:
  - Create a (free) personal [BitBucket account](https://www.atlassian.com/git/tutorial/git-basics).
  - Install Git and an SSH client.
  - Optionally, but recommended, read the BitBucket tutorials:
    - <https://www.atlassian.com/git/tutorial/git-basics>
    - <https://www.atlassian.com/git/tutorial/remote-repositories>
  - Clone your personal repository.
3. Source code submitted via homework/project repositories must compile correctly with the build/test system (or be parsed without error in the case of non-compiled languages). Homework/project submissions with source code that does not compile with the build/test system will receive 0 points.
4. Students must verify that homework/project has been submitted correctly, i.e., by logging in to the BitBucket web interface to check that their modifications have been uploaded.
5. **Late submissions will not be accepted at all because each assignment is discussed in class.**
6. Homework submissions must be submitted online via the Git repository. **Email submissions will not be accepted at all.**
7. Submitted work must be worked on individually. You must not use or look at anyone else's solution, and you must clearly acknowledge any code that you obtain from other sources (such as books, magazines, or the Internet). If you are in any doubt, contact the instructor well before the submission date for advice. You may use as much code as

you like (without acknowledgement) from the examples discussed in class. **Plagiarism will result in penalties up to and including failing the course.**

## **Expectations**

1. This is a challenging class that involves learning a new programming language and independent construction of your own compiler.
2. The course requires that students actively engage the material on your own. Students should not only read the notes and example programs, but also do self-tests, modify code, and run it. As always, figure out what you can definitely code, code it, try it, and then consider extending the boundaries.
3. Students must keep up with the assigned textbook reading.
4. Students are strongly encouraged to ask questions and offer comments relevant to the day's topic.
5. All electronic interactions are an extension of the classroom and should be treated as such. While disagreement can be part of the discourse, online communication should remain respectful and appropriate rather than demeaning and/or unprofessional.
6. Classroom use of a laptop or tablet must normally be restricted to class-related tasks such as note taking, checking references, code reviews, testing code examples, etc.

## **Policies II**

### **Retro-Active Withdrawal**

CDM understands certain extenuating circumstances can hinder one's ability for academic success and completion of course work. Please see <http://www.cdm.depaul.edu/Current%20Students/Pages/Enrollment-Policies.aspx> for additional information.

### **Absence Notifications**

In order to petition for an excused absence, students who miss class due to illness or significant personal circumstances should complete the Absence

Notification process through the Dean of Students office. The form can be accessed at <http://studentaffairs.depaul.edu/dos/academicprocesses.html>. Students must submit supporting documentation alongside the form. The professor reserves the sole right whether to offer an excused absence and/or academic accommodations for an excused absence.

## **Academic Integrity and Plagiarism**

This course will be subject to the university's academic integrity policy. More information can be found at <http://academicintegrity.depaul.edu/>. If you have any questions be sure to consult with your professor.

## **Academic Policies**

All students are required to manage their class schedules each term in accordance with the deadlines for enrolling and withdrawing as indicated in the University Academic Calendar. Information on enrollment, withdrawal, grading and incompletes can be found at: <http://cdm.depaul.edu/enrollment>

## **Incomplete Grades**

An incomplete grade is defined in the Student Handbook as follows (note that the policy in the undergraduate student handbook applies to both undergraduate and graduate students): A temporary grade indicating that the student has a satisfactory record in work completed, but for unusual or unforeseeable circumstances not encountered by other students in the class and acceptable to the instructor is prevented from completing the course requirements by the end of the term. Please see <http://www.cdm.depaul.edu/Current%20Students/Pages/Grading-Policies.aspx> for additional information.

## **Students with Disabilities**

Students who feel they may need an accommodation based on the impact of a disability should contact the instructor privately to discuss their specific needs. All discussions will remain confidential. To ensure that you receive the most appropriate accommodation based on your needs, contact the instructor as early as possible in the quarter (preferably within the first week of class), and make sure that you have contacted the Center for Students with Disabilities (CSD) at: [csd@depaul.edu](mailto:csd@depaul.edu)

- Lewis Center 1420, 25 East Jackson Blvd.
- Phone number: 312 362 8002
- Fax: 312 362 6544
- TTY: 773 325 7296

### **Dean of Students' Office**

The Dean of Students' Office (DOS) helps students navigate the college experience, particularly during difficulty situations such as personal, financial, medical, and/or family crises. For a list of support services and advocacy information, please visit <http://studentaffairs.depaul.edu/dos/>.

### **Online Course Evaluations**

Evaluations are a way for students to provide valuable feedback regarding their instructor and the course. Detailed feedback will enable the instructor to continuously tailor teaching methods and course content to meet the learning goals of the course and the academic needs of the students. The evaluations are anonymous; the instructor and administration do not track who entered what responses. A program is used to check if the student completed the evaluations, but the evaluation is completely separate from the student's identity. Since 100% participation is our goal, students are sent periodic reminders over three weeks. Students do not receive reminders once they complete the evaluation. Students complete the evaluation online in CampusConnect.
