Advanced SQL Program
A two-week program covering advanced Structured Query Language (SQL)

Overview
The Advanced SQL Program covers advanced features of Structured Query Language (SQL), a standard query language for accessing information from relational databases. Most of the SQL syntax covered in the program will be standard SQL and students will be directed to download a freely available database for practice. Program topics include correlated and non-correlated sub-queries, complex sub-queries, set operations, enhancements to the GROUP BY clauses, hierarchical retrievals, useful built-in functions, query re-write, and performance considerations. The program is designed for application developers, system analysts, database administrators, and technical support professionals who have basic SQL knowledge. Students will be instructed to download an open-source database. Students must have full administrator rights to their personal computers in order to successfully install and use the database.

Admissions requirements: Applicants should have basic knowledge of Structured Query Language (SQL) and familiarity with a database application environment. An application and application fee are required.

The Advanced SQL Program is one of several certificate programs offered by the College of Computing and Digital Media through its Institute for Professional Development. The program is catalogued as DePaul University course IPD 370 and carries 1.5 undergraduate-level credit hours (quarter system). The course credit and a certificate of completion from DePaul University are awarded to those who successfully complete the program’s academic requirements.

Spring Quarter 2020

Dates & Location:
Application deadline: May 1, 2020
Tuition deadline: May 8, 2020
Classes begin: May 20, 2020
Classes end: May 30, 2020

Remote Section:
Days & Times: Wednesdays, 5:45pm-9:00pm and Saturdays, 9:00am-12:15pm (Central Time)

There are four (4) class meetings over a two-week period. Classes will be held remotely at the indicated day and time via Zoom (or similar technology). Classes will be recorded, so any student who is not able to join at the specified time will be able to watch the recorded lecture at a time of his/her choosing.

What if I cannot make the live class meetings?
Attending the class meetings live is not required. You can still take this class by viewing the recorded classes and keeping pace with the weekly topics and assignments.

Fees:
Application: $40.00 (non-refundable) – to be submitted along with a completed application
Tuition: $1,000.00

Textbooks are a separate purchase to be made by students.

Full payment of tuition must be received by the Institute for Professional Development office before the start of the program. Students who elect to pay tuition using a credit or debit card will be assessed a non-refundable 2.75% convenience fee.

Refund/Cancellation: DePaul reserves the right to cancel any program before that program’s first scheduled meeting, in which case tuition fees (but not convenience fees) will be refunded. The university’s refund policy allows a return of 100% of tuition if the student drops the Advanced SQL Program by May 22, 2020 (convenience fees will not be refunded).

Please note: Any student who enrolls in a full-time course load (8 graduate or 12 undergraduate credit hours) and where at least one course is taught at an on-campus location will be automatically enrolled in the University’s CTA U-Pass program. The cost of the CTA U-Pass is $105.00 per quarter. Further information about the U-Pass program is found at upass.depaul.edu.
