Course Management System: D2L.

Prerequisites: NONE.

Course Description:

Students will analyze and discuss some of the most important and influential shows in television history. Students will learn all about the writer-centric form of scripted television, where it's been and where it's heading. Students study serials and procedurals, network and cable shows, principal leads, partnerships and ensembles, comedy and drama, prevalent themes, innovations in content and form, the impact of DVR, and the impact of the internet.

The purpose of this class is to enable students to study scripted television from the professional's point of view. The course involves critical analysis of successful scripted television shows, their narrative structures and themes. Programs of various genres and eras will be examined. Students will learn how to recognize basic structural elements in finished episodes. Students will develop a language with which to discuss television as well as a toolbox of techniques to use when creating television. Key concepts to be discussed include: basic structure, types of shows, genres of shows, character tropes, means of creating and sustaining tension, themes and advancements in form.

“More than jazz or musical theatre or morbid obesity, television is the true American art form.”

- Kenneth Parcell, 30 ROCK

Prerequisites:

None.

Learning Domain Description:

DC 229 Television Genres is included in the Liberal Studies program as a course with credit in the Arts and Literature domain. Courses in the Arts and Literature domain ask students to extend their knowledge and experience of the arts by developing their critical and reflective abilities. In these courses, students interpret and analyze particular creative works, investigate the relations of form and meaning and through critical and/or creative activity to come to experience art with greater openness, insight, and enjoyment. These courses focus on works of literature, art, theatre, or music as such, though the process of analysis may also include social and cultural issues. Students who take course in this domain choose three courses from such choices as literature, the visual arts, media arts, music, and theater. No more than two courses can be chosen from one department or program.

Learning Outcomes:

- Students will be able to explain, in well-written prose, what a television episode is about and or how it was produced. In addition to learning how to analyze and interpret narrative scripted

television, students also gain an understanding of how the development process affects the final content. Students will not only watch and analyze television, they will learn the socioeconomic and technological factors impacting the genre and industry. The papers in this class focus on students' understanding of Basic Structure, Character, Theme and eventually a complete analysis.

- Students will be able to comment on the relationship between form and content in a work. They will learn the generic expectations of a particular form and how an artist (writer, producer, actor, etc) can complicate, enrich or subvert these expectations. Analysis and examination of the relationship between form and content represents the bulk of this course. Students are given a framework of knowledge regarding what to expect from half-hour and hourlong scripted programming, both in terms of form and content. Once this framework has been established, students examine ways in which artists used the form to deepen the audience's sense of character, tension and theme. Students investigate these relationships through class discussions, exam questions, several shorter papers and a longer final paper in which they write a complete analysis for a television series.
- Students will be able to assess the formal aspects of their subject and put these qualities into words, using, when appropriate, specialized vocabulary employed in class and readings. To better equip them in their analysis of television, students will learn a mix of common cinematic and literary language in addition to specialized screenwriting and film-making vernacular. This language will be employed in class discussions, exams and several papers.
- Where appropriate, students will be able to consider the original audience to witness a work of art and consider how their expectations differ from our own. This examination may include the elements of form, rhythm or style, the visual material and aesthetic of a piece. Students will be able to articulate a subject as well as write about it, explaining how narrative and aesthetic elements comprise a particular style of television (art). Students will learn about the context in which each episode aired and how this context affected its original reception. Students will also learn about the genre of television, how it has evolved over time and the technological innovations shaping the genre today.

Learning Outcomes will be met through lectures, viewings and readings on the history and story structure principles of many television forms and measured via written papers, pop quizzes and a midterm exam.

Writing Expectations:

There are two 2-3 page Papers and one 6-10 page Final Paper in this course. Papers are expected to be free of spelling and grammatical errors. **It's YOUR work, YOU'RE responsible for its clarity.**

Writing Expectations will be met with three graded assignments. Two of these papers will be based on a show of the Professor's choosing, a longer paper will be based on a show of the student's choosing.

SCHOOL POLICIES:

Online Instructor Evaluation

Evaluations are a way for students to provide valuable feedback regarding their instructor and the course. Detailed feedback will enable the instructor to continuously tailor teaching methods and course content to meet the learning goals of the course and the academic needs of the students. They are a requirement of the course and are key to continue to provide you with the highest quality of teaching. The evaluations are anonymous; the instructor and administration do not track who entered what responses. A program is used to check if the student completed the evaluations, but the evaluation is completely separate from the student's identity. Since 100% participation is our goal, students are sent periodic reminders over two weeks. Students do not receive reminders once they complete the evaluation. Students complete the evaluation online at <https://mycti.cti.depaul.edu/mycti>

Email

Email is the primary means of communication between faculty and students enrolled in this course outside of class time. Students should be sure their email listed under "demographic information" at [CampusConnect](#) is correct.

Academic Integrity Policy

This course will be subject to the academic integrity policy passed by faculty. More information can be found at <http://academicintegrity.depaul.edu/>

Plagiarism

The university and school policy on plagiarism can be summarized as follows: Students in this course should be aware of the strong sanctions that can be imposed against someone guilty of plagiarism. If proven, a charge of plagiarism could result in an automatic F in the course and possible expulsion. The strongest of sanctions will be imposed on anyone who submits as his/her own work any assignment which has been prepared by someone else. If you have any questions or doubts about what plagiarism entails or how to properly acknowledge source materials be sure to consult the instructor.

Incomplete

An incomplete grade is given only for an exceptional reason such as a death in the family, a serious illness, etc. Any such reason must be documented. Any incomplete request must be made at least two weeks before the final, and approved by the Dean of the College of Computing and Digital Media. Any

consequences resulting from a poor grade for the course will not be considered as valid reasons for such a request.

Resources for Students with Disabilities

Students who feel they may need an accommodation based on the impact of a disability should contact the instructor privately to discuss their specific needs. All discussions will remain confidential. To ensure that you receive the most appropriate accommodation based on your needs, contact the instructor as early as possible in the quarter (preferably within the first week of class), and make sure that you have contacted either the PLS Program (for LD, AD/HD) or The Office for Students with Disabilities (for all other disabilities) at:
